

# Darshil Patil

Software Developer | Data Analyst | Data Engineer

+91-9172466884 | darshilpatil84@gmail.com | [LinkedIn](#) | [GitHub](#) | Pune, Maharashtra

## PROFESSIONAL SUMMARY

Motivated B.Tech Computer Engineering student with hands-on experience building production-grade data engineering and analytics solutions. Developed DataForge ETL, a full-stack enterprise ETL platform integrating PySpark, Great Expectations, and Claude AI, and RetailPulse360, an end-to-end retail analytics project processing 540K+ records with K-Means clustering and Power BI dashboards. Proficient in Python, SQL, data visualization, and machine learning. Seeking a Software Developer, Data Analyst, or Data Engineer role to generate actionable insights and drive data-driven decision-making.

## TECHNICAL SKILLS

**Programming Languages:** Python, SQL, PL/SQL, Java

**Data Analysis & ML:** Pandas, NumPy, Scikit-Learn, Matplotlib, K-Means Clustering, RFM Analysis, Feature Engineering

**Data Visualization:** Microsoft Power BI, Tableau, Matplotlib

**Databases:** SQL, PL/SQL, Database Design, Query Optimization Tools

**Platforms:** Git, Linux

## EDUCATION

**Bachelor of Technology (B.Tech) – Computer Engineering, Vishwakarma University**

2023 – Present (Expected 2027)

Pune, Maharashtra | CGPA: 7.96 / 10

**Class XII – Science (PCM with Computer Science), Maharashtra State Board**

June 2021 – March 2023

Maharashtra, India | Percentage: 74.83%

**Class X, Maharashtra State Board**

June 2019 – March 2021

India | Percentage: 77.2%

## PROJECTS

**DataForge ETL** – Enterprise Data Engineering Platform (Personal Project)

2025 | [dataforge-etl.onrender.com](https://dataforge-etl.onrender.com)

- Built a production-grade full-stack ETL platform using Python and Flask, supporting CSV, JSON, XLSX, and Parquet file ingestion through end-to-end configurable pipeline workflows
- Integrated PySpark, Pandas, and Great Expectations for scalable data ingestion, transformation, and automated data quality validation across 24,000+ record datasets
- Incorporated Claude AI for intelligent column analysis, PII detection, and natural language querying, with email/Slack alerts and multi-format export

**RetailPulse360** – Advanced Retail Data Analytics (Personal Project)

June 2025 | [github.com/Ved2705/RetailPulse360](https://github.com/Ved2705/RetailPulse360)

- Performed end-to-end data preprocessing, cleaning, and feature engineering on the Online Retail II dataset comprising approximately 540,000 records
- Implemented RFM (Recency, Frequency, Monetary) analysis and K-Means clustering to segment customers into actionable groups for targeted marketing insights
- Designed dynamic Power BI dashboards visualizing sales trends, product performance, and customer segmentation, with all work version-controlled on GitHub

## KEY ACHIEVEMENTS

- Solved 100+ problems on LeetCode with a focus on medium-difficulty DSA, alongside daily aptitude and core CS practice for campus placements
- Built DataForge ETL, a live enterprise-grade ETL platform integrating 6+ industry-standard tools including PySpark, Great Expectations, and Claude AI
- Completed RetailPulse360, processing 540K+ records with machine learning and Power BI, demonstrating end-to-end data analytics capability
